PROFESSIONAL SUMMARY

Mechanical Engineering student graduating in December 2025 with a solid foundation in design, analysis, and problem-solving. Eager to apply academic knowledge to real-world engineering challenges in a dynamic, innovative environment. Seeking a full-time engineering position by the end of 2025 to contribute my skills and expertise to a forward-thinking team.

WORK EXPERIENCE

Product Engineer, John Deere | 12/23 - 12/25

- o Developed and optimized dynamic system models using Simulink and MATLAB, leveraging object-oriented programming for efficient testing and faster product development
- o Enhanced a low-fidelity Simulink model by integrating additional system components, improving its accuracy in representing real-world performance
- o Implemented the improved model into multiple larger system simulations to enhance overall fidelity
- o Engineered a process to extrapolate data and converge to a specified limit, semi-automating a manual task to enhance efficiency and reduce errors
- o Collaborated with multiple teams, facilitating effective information sharing and project alignment
- o Increased project engineering validation testing by 90% to verify simulation accuracy and ensure compliance with established standards

Undergraduate Lab Assistant, Bioeconomy Institute | 10/22 - 10/23

- o Conducted maintenance, troubleshooting, and testing on BAT Pyrolysis Reactor, ensuring optimal performance and reliability.
- o Documented experimental results, maintaining accurate records to support data analysis and reporting.
- o Identified and implemented strategies to improve laboratory efficiency
- o Learned about pyrolysis and its potential environmental impacts on renewable fuels

Hired Hand, S&N Family Farm | 01/10 -03/23

- o Collaborated on daily family farm operations, honing problem-solving, adaptability, and process optimization skills through hands-on teamwork in fast-paced agricultural environments

IT Customer Service, SurgeIT | 05/21 - 01/22

- o Developed strong client communication and problem-solving skills through daily customer support, ensuring technical issues were resolved efficiently

ADDITIONAL EXPERIENCE

Design Hydrotreating Reactor for Renewable Fuel Processing, Bioeconomic Institute | 2025

- o Reviewed fuel processing techniques to identify opportunities for optimization and improvement
- o Designed lab-scale reactor to increase hydrotreating efficiency
- o Applied optimization methods to increase efficiency and understand design implications for a larger apparatus

EDUCATION

Iowa State University | 2022-2025

Bachelor of Science in Mechanical Engineering

- o GPA: 3.66
- o Dean's List 2022-2025

SKILLS

Matlab

Solidworks

Simulink

GitHub

Excel

C++ for Robotics
