Evan Hoeger

Dear, Ag Leader

I was excited to see that you are planning to attend the career fair on 9/19/23. I am a student at Iowa state who plans to stay in Ames for the summer. As an Engineering student with a background in agriculture I think that I will make an amazing fit for your company.

While working at the Bio-renewables laboratory at Iowa state I learned many skills. From working with other undergrads to set up the reactor. To making adjustments to the reactor setup to make things run more smoothly. I think that these skills plus my optimism and dedication to learn new skills will make me a valuable asset to your team.

I'm excited to hear from you, so reach out when you get the chance.

Thanks,

Evan Hoeger
